

# Integration Tests (Endpoint Test)

This Test can be found "`\src\Utopia\UtopiaTesting\Tests\LoadTests\LocalFullEndpointTest.jmx`". As of 1/25/2021 This test was used for general purpose localized testing. No effort was used to make this an Integration test. A few of the modules were updated in the process of Converting to Postgres and switching from .Net Framework to .Net Core 5.0. Not all modules were tested or revised with current Utopia changes/fixes to Endpoint logic.
