O365 (WOPI) Integration

- [Settings that require Microsoft to manually update](#)

Settings that require Microsoft to manually update

> Official Microsoft docs can be found **_HERE_**.

> This document is meant to supplement the official docs above, not comprehensively cover things.

Settings that require Microsoft to manually update

WOPI Domain Allow List

- form to submit change to list (at time of writing) can be found here
- even subdomains of must be added to this list
- state at time of writing is unknown but it does at least have the following
  - efilecabinet.net
  - account.revverdocs.net
  - app.revverdocs.com

Redirect Domain Allow List

  - state at time of writing is unknown, but the following redirect domains do work
    - utopia.revverdocs.com
    - account.revverdocs.com
  - subdomains do not need to be added to this list

'Saved to…' Name

  - at time of writing still says '**_Saved to Rubex_**'
