

State/Country Picklist & Code Values

We use picklist fields for all standard Address fields in Salesforce. This means that the State/Province and Country fields **must** be valid picklist values.

"Under the hood", Salesforce has ISO Code fields for the State/Province and Country fields as well. These fields are called "State Code" and "Country Code". For record imports/updates, the Code fields are *easier* to use than the actual picklist fields users see in the UI.

At Revver, **we require a State/Province AND Country pair** for the following countries:

- United States
- Canada

For all other countries, we do NOT require a State/Province value.

See the charts below for a full reference of the Country+Country Codes as well as the State/Province + State Codes (for US and Canada).
