Managing your Barracuda Quarantined Emails

You can manage your own Barracuda settings and block or allow quarantined messages. To do this please follow the instructions below:

- Find an email from Barracuda about quarantined email (search for "Defense Quarantine") and click on the link that says "Manage Quarantine". Or go directly to

  https://ess.barracudanetworks.com/user/auth/login
    - image.png Image not found or type unknown
- Enter your email address then click "Next"
    - image.png Image not found or type unknown
- If you have already set a password, you can enter it now. If you never set a password of have forgotten what it is, please lick on the "Send login information" link.
    - image.png Image not found or type unknown
- Check your email and click on the link that was sent to set up a password
    - image.png Image not found or type unknown
- You can now go through your message log and block or allow messages
    - image.png Image not found or type unknown
- Or you can change how often you get email notifications
